HEMEROCALLIS

and

HOSTA

GROWN BY

H. A. ZAGER

4215 URBANDALE AVE.

Des Moines 10, Iowa

2 CENTS 2

HEMEROCALLIS

HEMEROCALLIS do equally well in sun or shady location. Will grow in poor or rich soil or acid, sandy or clay soil but should have fertilizer, water and cultivation to be at their best. They have no diseases nor insect pests and grow in wet soil as well as dry.

The season of bloom is from the middle of May till September, foliage always green and attractive, varying in shades of green, in height, in width and carriage according to variety.

Can be transplanted any time the ground is not frozen without loss but best time to plant is spring and after clones have bloomed.

I endeavor to give plants or divisions as large as possible for the price and all should bloom if planted early in season.

Plants true to name to the best of my knowledge and are guaranteed to arrive in good condition. Should any losses or mistakes occur I will gladly make adjustments or replacements.

Terms are cash with order. Orders of \$2.00 and more are prepaid to third zone from Des Moines. Minneapolis, Chicago, St. Louis, Kansas City and Lincoln, Nebr., are in third zone from Des Moines. If you live beyond these cities include 5% extra of order for postage. On orders under \$2.00 add 25c extra for postage and packing charge. Orders will be sent by parcel post unless otherwise requested.

ALLADIN (Stout)—Outer half of flower golden yellow. Garnet-brown spot on petals. Flowers clustered and present a dazzling effect. Remains open evenings. Repeats in fall. Blooms in June on three foot stalks.....**50c**

CORAL PIECE (Plouf)—Coral blended rose, of good size with wide open flowers. Midseason. 36".....\$1.50

CRAEMORE HENNA (Plouf)—Flowers of good size and form of fulvous reddish color on stalks 2½ ft. tall. Desirable because of early mid season bloom, June and July.\$1.00

CURLYPATE (Scheffy)—Yellow of medium size, good substance, edges of petals crinkled and recurved, late blooming in July-August. 40".....75c

DAUNTLESS (Stout) — Deep yellow with greenish throat, pastel shaded eye, or attractively blended midzone, in alternate petals. Wide overlapping petals 4½ inches or more across. Fragrant. July-August. 30".....**50c**

DAWN (Perry)—5" flower fulvous rose, sulphur yellow base. July, August. 3½ ft.**60c**

DAWN PLAY (Nesmith) — An open flower of good size, of velvety rose with golden throat, tall and stately. Midseason. 3 ft.....**\$2.00**

DAZZLER (Dreer)—Deep golden yellow flowers of a rich deep golden yellow with broad petals, flowers measure 6 inches and more in diameter, blooms in July, 2½ ft. Best mid-season orange **60c**

DOLLY VARDEN (Nesmith)—Open full flowers of Chinese Coral with slight lines of deeper rose on the sepals and petals. Very floriferous on sturdy 3 ft. stalks. July**\$1.00**

DOMINION (Stout)—Large flowers with broad sepals and petals—reddish brown in color with yellow throat, blooms June, July and again later in season. 3 ft.....**\$1.50**

DOROTHEA (Lester)—The 6-inch flowers have a soft, unusual, and very beautiful coloring which gives an orchid-lavender effect. The flower has a light yellow ground color which is flushed with heliotrope and also has a deeper heliotrope eye zone. Blooms in July and August. 3 ft.....**\$3.00**

DOROTHY McDADE (Sass)—Flower of good size of medium yellow color on stalks 3 ft. tall. Latest of Sass varieties to bloom, in July and August**\$1.00**

DOVER (Betscher)—Clear light apricot yellow, flower 5 inches spread. Edges of petals ruffled, has a long season of bloom, early June into July. Formerly Cressida. 3 ft.....**50c**

DRESDEN DOLL (Nesmith)—The flowers have a soft cream background flushed with salmon buff. Firm substance and the petals and sepals stand out like dainty china. Tall and well branched. Blooms in July-August. 4 ft.....**\$1.50**

DUSKY PINK (Merry)—The flowers are of good size and substance with broad sepals and petals of a firm, dusky pink. Tall and well branched. 3½ ft. Mid-season\$1.50

E. A. BOWLES (Betscher)—reddish orange, blended with paler orange and gold. Large open flowers with ruffled petals. Excellent. Midseason.....60c

EARLIANA (Betscher)—An extra early blooming variety of golden yellow of good size. Blooms in May and June. 30"\$1.00

ELSA (Sass)—Pastel shade of peach and apricot, flower of good size. Beautiful in clump when established. Late Midseason 3 feet.\$1.00

EMILY HUME (Hume)—Light orange yellow flowers have petals that are twisted curled, pinched at the tips, making them most decorative in the garden or as cut flowers for daytime arrangement. Form similar to Wau-Bun, blooms later and lighter shade. Blooms July on stalks 2½ feet high75c

ENCHANTRESS (Bristol Nurseries)—Blossoms of medium size, perfectly formed are carried in clusters on tall stately stems. Color soft yellow deepening to a faint copper-gold, with just a slight flush of tender pink in the throat. 3½ feet tall. Blooms mid-July into August60c

E. W. YANDRE (Hayward)—The flowers are large with broad petals, wide open. The sepals have creped edges. Good substance. The color is rosy buff and gold. 3 ft. Midseason.....\$1.00

FANTASIA (Stout)—The wide spreading petals are twisted and curled, flower of good size. Color composed of pale and faint red tints, increasing to Burnt Sienna tip of petals. 30". Midseason\$1.00

FASCINATION (Hall) A pleasing tone of medium yellow with a prominent halo. The flowers are very broad petaled and large. The strong 40 inch scapes have the best branching of any Daylily I have seen and carry up to 50 flowers on established plants, midseason. (Originators's description.\$2.00

- FESTIVAL** (Stout)—A gay bicolor. Sepals orange with brown tinge; petals English red with darker veins and orange mid-stripe. A vigorous grower; erect, with many well branched stalks 3½ ft. tall, in bloom July and August\$1.00
- FIREFLY** (Bechtold)—Brilliant red effect on wiry stems two feet tall. Flowers of medium size, but many of them June-July60c
- FIRETHORN** (Nesmith) Medium sized flowers of Dragon blood red with ruffled petals and sepals and a rich orange cup with red stamens in the center of the bloom. Of multiflora parentage, it has a myriad of bright red flowers carried in clusters on slender stalks. Midseason. 36".....\$1.00
- FLAVINA** (Fewkes)—A charming dainty flower of light lemon yellow. Blooms May, June with Flava. Blooms more round and petals broader than Flava. 2½ ft.\$1.00
- FULVA ROSEA**—Species from China introduced by Dr. Stout. A beautiful hemerocallis of fine form and exquisite coral red or rose pink, the color is uniform though blending a little lighter in throat. About 3 ft. Blooms in July and August.....\$1.00
- GAIETY** (Betscher)—Large blossoms of palest lemon yellow, wide open form on stalks 3 feet tall. Blooms June, July\$1.00
- GAY DAY** (Mrs. Nesmith)—Soft yellow flowers with great substance and beauty, borne on sturdy stems 3½ feet. Late midseason75c
- GAY TROUBADOUR** (Nesmith)—Large flowers. Petals are bright Indian Red, sepals frosty maize yellow, an outstanding bi-color. Late midseason. 40"\$2.50
- GEORGE YELD** (Perry)—Large flowers of bronzy apricot flushed with brownish red. Midseason. 36".....40c
- GLOAMING** (Cook)—Large open blooms with yellow background, heavily overcast with reddish rose-purple. The whole flower has a sparkling beauty that is most pleasing. 3½ feet tall. July-August\$1.00

- GLORIANNA** (Betscher) — Rich clear pure deep yellow, without a trace of any other color, blooms in June well into July. 3 ft.....**50c**
- GOLD DUST** (Yeld)—Low growing variety of value on account of early blooming. Soft empire yellow, blooms with Iris. Each.....**40c**
- GOLDEN BELL** (Ruys)—Fragrant flowers of large size, of apricot orange shade, in bloom in July and August on stalks 3 ft.....**75c**
- GOLDEN BYNG OF VIMY** (Perry)—Flowers of large size, recurved in form of rich golden yellow shade with midrib of golden buff. Blooms in July and August on stalks 4 ft. tall.**75c**
- GOLDEN DREAM** (Betscher) — Deep clear orange of good form, size and substance. Late blooming. July, August. 2½ ft.....**50c**
- GOLDENI**—Deep golden orange, vigorous in habit, profuse in bloom. Long season. July, August. 3 ft.....**25c**
- GOLDEN SCEPTER** (Nesmith) — A tall and stately day lily with flowers of rich golden orange. The blooms are fluted with exceptional heavy waxlike substance, many buds to a stalk. Blooms July-August. 3 ft.....**75c**
- GOLDEN TRUMPET** (Bristol) Refined, attractive, tall, very light yellow of large size. A larger, taller, later Hyperion. Late midseason. 36"...**\$1.00**
- GOLDEN WEST** (Sass)—Lovely large funnel-shaped flowers, a deeper shade than Sunny West. Blossoms are of heavy texture making this a wonderful garden variety. 4 ft. tall. July and August **\$1.00**
- GOLD IMPERIAL** (Perry)—Large flowers of glowing deep yellow with broad petals on 4 ft. stems, long season of blooming. Splendid variety July, August**60c**
- GOLIATH** (Bechtold) — The flowers are large and wide open, of firm substance, many open at once. A prolific bloomer. The color is deep yellow. Tall well branched stalks. 3 ft. Mid-season **\$1.00**

GRANADA (Traub)—Sepal and petals uniform shade of reddish bronze shading to yellow throat, yellow mid-rib center of petals enhances beauty of flowers, a glorified Bagdad of darker shade. Blooms in June and July**60c**

GYPSY (Betscher)—Orange with slight red shadings blended beautifully together giving it appearance of smoky orange, about 5 inches spread. 3½ ft. tall. Stems and foliage strong, blooms late July**40c**

HANKOW—Introduced by Dr. Stout. The flowers are large, wide-spreading (5½ inches), rich yellowish orange with a bold scarlet eye-zone in the petals, one of the finest Hemerocallis. 3½ to 4 ft. July-August.....**50c**

HELEN WHEELER (Traub)—Large flower of coral pink with deep yellow throat. One of the best in this class. Midseason. 36"**\$1.50**

HESPERUS (Sass)—Lovely seven inch blooms, empire and light cadmium yellow giving a delightful Jersey cream effect. Several flowers open at once on tall, well branched stalks four feet tall. Blooms in July and August**75c**

HIAWATHA (Stout) — It produces a shower of medium golden flowers held waist high, giving an airy touch in the garden. The flower remains open in the evening and are useful for flower arrangements. Blooms June, July, 3 ft.....**50c**

HOSTA

Hardy herbaceous perennials with handsome green or variegated foliage. Flowers lily-like on graceful stems.

Do best if grown in shade or partial shade, ideal for north side of building or shady place among foundation planting or shady place in garden.

Should be grown in rich, well manured soil and watered well in dry weather for best results.

Can be planted any time from spring till fall. Plants shipped soon as possible after May 1s

CAERULEA—The true variety has the bluest flowers of any of the Hostas. It is the next largest in size of flower to *H. plantaginea* with very round puffed out bells of lavender blue distinctly penciled on the inner surface with deeper color. The leaves are glossy green of large size and graceful form. Use for border planting with pale yellow *Hemerocallis* in the background. July-August. 3 ft.....**50c**

HOSTA DECORATA—The blunt plantain-lily has blunt dark green leaves with white edges. The leaves are about one foot high and the blade about five inches by three inches. In a couple of years a small plant makes a rosette of leaves two feet across. This rosette of leaves of green and white coloring forms an excellent end for a flower bed against a lawn as the outer leaves bend to the ground. The flowers, in the early part of August, are fat bells standing out at right angles on a two-foot stalk. The blossoms of purple have lines of white, so that the effect is not a solid color. Blooms in August.....**75c**

The blunt plantain-lily
(*Hosta decorata*).

ERROMENA—This *Hosta* has been identified through illustrations and description in "Bailey Herbarum" as *Hosta Erromena*. Listed and sold also under names *Japonica* and *Lancifolia Undulata*.

It is a robust growing plant with dark green leaves with prominent curved veins either side of midrib, blade of leaf about 8 to 10 inches long, about 4 inches broad. Flowers pale lilac bells on stalks 2½ feet tall, blooms in July75c

FORTUNEI—A very fine outstanding species with good size glaucous leaves. Makes a fine specimen plant. Foliage not quite as large and more pointed than *Seiboldiana*. Lavender blue bell shaped flowers on stems 2 ft. or more in July **75c**

Hosta Fortunei Alba Marginata

FORTUNEI ALBO-MARGINATA

This tall, showy plantain-lily has arching leaves two feet long that sweep over to the ground. The leaf blade, six inches by ten inches, is shiny green, edged with a one-half band of white. The very pale lavender flowers, almost white, are dainty, bell-shaped, spread along a three-foot stalk and start blooming in early July. Each **\$1.50**

Fortunei Gigantea

FORTUNEI GIGANTEA—Also called tall cluster plantain lily. Leaves are blue-green of large size and are crinkled. Flowers pale lilac, well separated on tall stalks that rise well above the foliage. Blooms early in July.

Each\$1.00

Hosta Glauca, Photo by Sam Vandivert

FORTUNEI VIRDIS MARGINATA.—

Large pointed leaves of olive green with a broad margin of dark green. Flowers are bell shaped and lavender pink in color and blooms in July on stalks 2 ft. Plant turns dark green late in summer\$1.50

GLAUCA—Foliage glaucous blue, heavy leathery in texture of a seersucker nature. Leaves similar in form to Seiboldiana but smaller in size and more rounded. Has the most powdery blue leaves of any Hosta. Prized for its color and form. Flowers lavender purple, bells which rise well above the foliage. Stock very scarce..\$2.50

GLAUCA VARIEGATA — Same form as Hosta Glauca. Has medium sized leaves that are crinkley, overcast with a glaucous sheen. The leaves are green and yellow and retain their color throughout the season. Plant is of medium height. This is a very rare variety\$3.00

LANCIFOLIA ALBO-MARGINATA—The narrow-leaved plantain-lily, is a rapid grower. The slim light green leaves have a white line along the edges of the narrow blades. The leaves are about eight inches to twelve inches long. The flowers are lavender, with white lines, bell-shaped, on two-foot stalks in the middle of August. This makes a bushy growth of leaves and a thick border plant. It is a very pleasing plantain-lily and desirable to have as it blooms vigorously and freely.50c each

(Picture on next page)

The narrow-leaved plantain-lily (Hosta lancifolia albo-marginata).

LANCIFOLIA FORTIS—Lance leaf plantain lily. Long lance like foliage, dark green in color, produced in abundance. Flowers are violet. Bloom September and October on stems two feet tall, very floriferous and especially welcome as it is in bloom over a long period in the fall when flowers are scarce. **35c**

LANCIFOLIA TARDIFLORA — Leaves small, narrow, the smallest of the Lancifolia type and one of the latest to bloom. Blooms in September and October. Lavender flowers on stems 16 inches tall. Distinctive, rare variety. Plants should be mulched over winter. **\$2.50**

MINOR ALBA—Dwarf form. Splendid for rock gardens or edge of shady border. Foliage bright green. Flowers white, bell like in form on stems 12 inches tall. Fine for cutting. Blooms in August and September.....**75c**

NAKIOMA — Species from Japan with light green round leaves that are pointed, of good size. Plant grows 12 to 15 inches tall. Deep lavender flowers early-midseason on stalks 2 ft. tall. Often blooms second time later in season after plant is established.
Each**\$1.50**

The short-cluster plantain-lily (Hosta sieboldiana) with the wavy-leaved Hosta undulata at right.

HOSTA SIEBOLDIANA — Short-cluster or more across. The huge gray leaves will eventually grow large enough to hide the flower stalks with their clusters of lovely palest lavender flowers of thick texture. The leaves about two feet or more high are a rich gray and the blade of the leaf about ten inches by twelve inches in size. This plant begins to bloom about the first of July. The time for all the blossoms in the flower cluster of a plantain-lily to bloom up the stalk covers two or three weeks. This variety is a very conspicuous and decorative plant....**75c**

Hosta subcordata Grandiflora

SUBCORDATA GRANDIFLORA — Also listed as Plantaginea. Large yellowish green leaves on long stems. Largest blooms of all Hosta. Pure white, lily-like in form. In bloom August, September. 24 inches..... **50c**

UNDULATA UNIVITTATA. The heavy, waxy, dark green leaves are very decorative with wide creamy, white stripe in the center of the leaves, the long bell shaped flowers, lavender shade. Bloom in July on stems 30 in tall **50c**

UNDULATA VARIEGATA — This plant has more white in foliage and leaves are more wavy than preceding variety. Blooms in July. Lavender blossoms **75c**
